Re: Water Shutoff

Date: May 18, 2016

We have a scheduled dig taking place on SUNDAY May 22, 2016 at Corliss Lane. We need to repair a leaking hydrant in front of Indian Stream Clinic. This may affect the clinic, hospital and residents on Corliss Lane.

While we hope the water will not have to be shut off, we cannot guarantee that it won't need to be shut off. You may wish to fill pails of water or your bathtub with water so that you will have water to flush toilets. Your cooperation during this time is appreciated.
